

Volunteer to Help the Ocean!

Stencil the message **"No dumping flows to Bay"** above storm drains on city streets around the Monterey Peninsula and the City of Salinas.

Urban runoff or storm drain pollution is one of the leading sources of ocean pollution. Water flowing off streets into storm drains carries motor oil, cigarette butts, trash, fertilizer, soap and antifreeze straight to the ocean.

Great for community service hours, clubs, church groups, or a group of friends and family that want to make a difference!

Monterey Peninsula Contact:

Maris (831) 899-9957, email: maris@savethewhales.org

City of Salinas Contact:
